PROFESSIONAL SUMMARY

Cloud Security Engineer (DevSecOps), trained at Cloud Sentrics Ltd since 2023, with hands-on AWS security experience since 2024 designing, automating and securing cloud environments with Terraform and GitHub Actions. Built more than a dozen end-to-end AWS security solutions covering identity and access management, governance, threat detection, SIEM, incident response, compliance and data protection, each with automated Infrastructure-as-Code security scanning (KICS). Also experienced in penetration testing and vulnerability assessment across web application, network, cloud and API environments, gained through Cloud Sentrics training. Completed three IBM cybersecurity courses (Cybersecurity Architecture, Cybersecurity Essentials, Cybersecurity Careers) and currently expanding core cybersecurity skills through further IBM courses.

TECHNICAL SKILLS

Cloud Security (AWS): IAM, IAM Identity Center, AWS Organizations, Service Control Policies (SCPs), Security Hub, GuardDuty, AWS Config, CloudTrail, CloudWatch, KMS, IAM Access Analyzer, VPC network security, S3 security

DevSecOps and IaC: Terraform, Terragrunt, GitHub Actions, CI/CD pipelines, KICS (IaC security scanning), reusable modules

Detection, Response and Compliance: SIEM pipelines, security monitoring and alerting, incident response automation, compliance automation, CIS-aligned controls, vulnerability management, cybersecurity architecture

Penetration Testing: Vulnerability assessment and penetration testing of web applications, networks and infrastructure, cloud environments (AWS, Azure, GCP) and APIs

Programming and Tools: Python, Bash, YAML, HCL, Git, GitHub, AWS Lambda, SNS, Athena

TRAINING AND CERTIFICATIONS

IBM Cybersecurity Certifications (offered through Coursera)

- **Cybersecurity Architecture**, Sept 2026. Credential: coursera.org/verify/9MNEICZPMB94
- **Introduction to Cybersecurity Essentials**, Sept 2026. Credential: coursera.org/verify/YNC77CZTPKR5
- **Introduction to Cybersecurity Careers**, Sept 2026. Credential: coursera.org/verify/8JXN24B13MOK
- **Additional IBM cybersecurity courses** - in progress

Other Training

- **Cloud Security Engineering (DevSecOps) Training**, Cloud Sentrics Ltd, 2023 - Present (continuous learning), including penetration testing and vulnerability assessment

PROFESSIONAL EXPERIENCE

Cloud Security and DevSecOps Engineer (Independent Projects) 2024 - Present

Remote

- Designed, built and deployed end-to-end AWS security solutions as Infrastructure as Code using Terraform and Terragrunt.
- Integrated GitHub Actions with KICS in every solution to automate IaC security scanning, validation and deployment (secure-by-design practice).
- Implemented identity security, centralized governance, logging, SIEM, automated incident response, compliance reporting, secure storage and backup verification.
- Published all work on GitHub with source code, commit history and CI/CD pipelines for full transparency.

Administrative and HR Intern (NYSC) Jan 2025 - Dec 2025

Lagos State Ministry of Tourism, Arts and Culture, Lagos, Nigeria

- Supported administrative operations, records management and documentation across departments.
- Collaborated cross-functionally while maintaining confidentiality, accuracy and governance standards.

FEATURED SECURITY PROJECTS

Secure Multi-Account Landing Zone | Terraform, Terragrunt, GitHub Actions, KICS

- Designed an enterprise AWS Organizations landing zone with centralized governance, identity and security controls across all accounts.
  github.com/OlamiOla/Secure-Multi-Account-Landing-Zone

IAM Risk Analyzer | IAM, KMS, Terraform, GitHub Actions, KICS

- Built automated least-privilege analysis across IAM identities that flags risk and drives auto-remediation with a full audit history.
  github.com/OlamiOla/IAM-Risk-Analyzer

Automated Incident Response System | AWS security findings, automation, alerting

- Created an automated detection-to-remediation workflow triggered by security findings, with alerting and an audit trail.
  github.com/OlamiOla/Automated-Incident-Response-System

Cloud Log Aggregation and SIEM Pipeline | CloudTrail, Athena, Lambda, SNS, Slack

- Built centralized log aggregation and a lightweight SIEM pipeline that turns CloudTrail activity into queryable, alertable security signals.
  github.com/OlamiOla/Cloud-Log-Aggregation-and-SIEM-Pipeline

Automated Compliance Checker | Security Hub, AWS Config, Lambda

- Automated continuous compliance checks against Security Hub and Config findings, with trend tracking and reporting for audit readiness.
  github.com/OlamiOla/Automated-Compliance-Checker

Cloud Vulnerability Scanner | Terraform, GitHub Actions, KICS

- Automated discovery of cloud security weaknesses with centralized findings, reporting and notification workflows.
  github.com/OlamiOla/Cloud-Vulnerability-Scanner

ADDITIONAL PROJECTS

- **Secure S3 Storage**: hardened S3 baseline with KMS encryption, access analysis and full access logging (Terraform)
- **AWS Security Audit and Hardening**: IAM, exposure and MFA audit across 6 modules
- **CloudWatch Security Monitoring**: CIS-aligned alarms and dashboards
- **Secure VPC Network Architecture**: hardened network design with IaC scanning
- **Cloud Backup Verification System**: S3, RDS and EBS backup discovery and alerting
- **Cloud Cost Anomaly Detection**: multi-account spend and usage anomaly alerting
- **IAM User and Role Management**: groups, roles, policies and CloudTrail across 5 modules
- **Enterprise Cloud Security Platform (in progress)**: unified governance, monitoring and compliance controls

Full portfolio: github.com/OlamiOla

EDUCATION

B.A. Philosophy Completed Sept 2024

Osun State University, Nigeria

LEADERSHIP AND ACTIVITIES

- Legislative Council Member, Osun State University Student Union
- Special Advisor to the Speaker, College of Humanities, Arts and Culture
- Student Representative Council Member, Faculty of Arts and Humanities
