- Git
- GitHub

[EDUCATION]

B.A. Philosophy
Osun State University
SEPT 2024

[LEADERSHIP]

- Legislative Council Member, Student Union
- Special Advisor to the Speaker, College Assembly
- Student Representative Council Member

[PROFILE]

Cloud Security Engineer (DevSecOps) with hands-on experience designing, automating, and securing AWS environments using Terraform, GitHub Actions, and Infrastructure as Code. Designed and implemented **an extensive portfolio of end-to-end AWS cloud security solutions** covering identity security, governance, compliance, monitoring, SIEM, disaster recovery, secure storage, and cost governance — implementing IAM, AWS Organizations, IAM Identity Center, Security Hub, GuardDuty, Config, CloudTrail, CloudWatch, KMS, Lambda, SNS, Athena, and S3. Every solution integrates GitHub Actions with KICS for automated IaC security scanning, validation, and deployment, reflecting a secure-by-design engineering practice.

[EXPERIENCE]

Cloud Security Engineer (DevSecOps)

2026 — Present

Cloud Sentries · Remote

- Designed reusable Terraform modules to provision secure AWS infrastructure following Infrastructure as Code and AWS security best practices.
- Built automated CI/CD pipelines in GitHub Actions to validate, scan, and deploy cloud infrastructure changes with consistent security gates.
- Integrated KICS static analysis into every deployment pipeline to catch Infrastructure as Code misconfigurations before they reach production.
- Implemented and operated core AWS security services — IAM, Security Hub, GuardDuty, CloudTrail, AWS Config, CloudWatch, KMS, Lambda, SNS, S3, and Athena — to monitor and secure cloud environments.
- Authored technical documentation, architecture diagrams, and deployment/operational guides to support ongoing maintenance and onboarding.

Administrative & HR Intern (NYSC)

Jan 2025 — Dec 2025

Lagos State Ministry of Tourism, Arts and Culture

- Supported administrative operations, records management, and documentation across departments.
- Collaborated cross-functionally while maintaining confidentiality, accuracy, and governance standards.

[FEATURED PROJECTS]

Selected highlights from an extensive portfolio of AWS security builds — full set continues on page 2.

Secure Multi-Account Landing Zone

01

Enterprise AWS Organizations landing zone implementing centralized governance, identity, and security controls across all accounts.

Tech: Terraform · Terragrunt · GitHub Actions · KICS
GitHub: github.com/OlamiOla/Secure-Multi-Account-Landing-Zone

IAM Risk Analyzer

02

Automated least-privilege analysis across IAM identities, flagging risk and driving auto-remediation with full audit history.

Tech: IAM · KMS · Terraform · GitHub Actions · KICS
GitHub: github.com/OlamiOla/IAM-Risk-Analyzer

[FEATURED PROJECTS – CONTINUED]

Cloud Log Aggregation & SIEM Pipeline03 Centralized log aggregation and lightweight SIEM pipeline turning CloudTrail activity into queryable, alertable security signal. Tech: CloudTrail · Athena · Lambda · SNS · Slack GitHub: github.com/Olami01a/Cloud-Log-Aggregation-and-SIEM-Pipeline	Automated Compliance Checker04 Continuous compliance checks against Security Hub and Config findings, with trend tracking and reporting for audit readiness. Tech: Security Hub · AWS Config · Lambda GitHub: github.com/Olami01a/Automated-Compliance-Checker
Cloud Vulnerability Scanner05 Automated discovery of cloud security weaknesses with centralized findings, reporting, and notification workflows. Tech: Terraform · GitHub Actions · KICS GitHub: github.com/Olami01a/Cloud-Vulnerability-Scanner	Secure S3 Storage06 Hardened S3 storage baseline with encryption, access analysis, and full access logging by default. Tech: S3 · KMS · Access Analyzer · Terraform GitHub: github.com/Olami01a/secure-s3-storage

[ADDITIONAL PROJECTS]

AWS Security Audit & Hardening

IAM, exposure & MFA audit across 6 modules

<https://github.com/Olami01a/aws-security-audit-hardening>

CloudWatch Security Monitoring

CIS-aligned alarms & dashboards

<https://github.com/Olami01a/CloudWatch-Security-Monitoring>

Secure VPC Network Architecture

Hardened network design & IaC scanning

<https://github.com/Olami01a/SecureVPC-network-architecture>

Cloud Backup Verification System

S3/RDS/EBS backup discovery & alerting

<https://github.com/Olami01a/Cloud-Backup-Verification-System>

Cloud Cost Anomaly Detection

Multi-account spend & usage anomaly alerting

<https://github.com/Olami01a/Cloud-Cost-Anomaly-Detection>

IAM User & Role Management

Groups, roles, policies & CloudTrail across 5 modules

<https://github.com/Olami01a/Iam-user-and-role-management>

[LEADERSHIP & ACTIVITIES]

Legislative Council Member Osun State University Student Union	Special Advisor to the Speaker College Assembly
Student Representative Council Member Osun State University
